

ABSTRACT

Provided is an aqueous liquid detergent composition containing a long-chain fatty acid glycol ester represented by the following formula (1):

wherein, A is H or COR<sup>2</sup>, R<sup>1</sup> and R<sup>2</sup> represents a C<sub>11-21</sub> alkyl or alkenyl group, and m stands for a number of from 1 to 3, and a surfactant, wherein the fatty acid constituent of the long-chain fatty acid glycol ester contains 60 wt.% or  
10 greater of fatty acids having 18 or more carbon atoms, 40 wt.% or less of a fatty acid having 16 carbon atoms, and 5 wt.% or less of fatty acids having less than 16 carbon atoms; and the composition has a pH of from 1 to 5 at 25°C when diluted to 20 times the weight with water.

15                    The detergent composition has benefits such as an elegant and expensive-looking pearl luster, is excellent in stability of a pearling agent, particularly long storage stability at high temperatures, and has good detergency and foaming property.
